Automate Configurable Workflows for Greater Efficiency

MaintStar Public Works Suite for Enterprise Asset Management

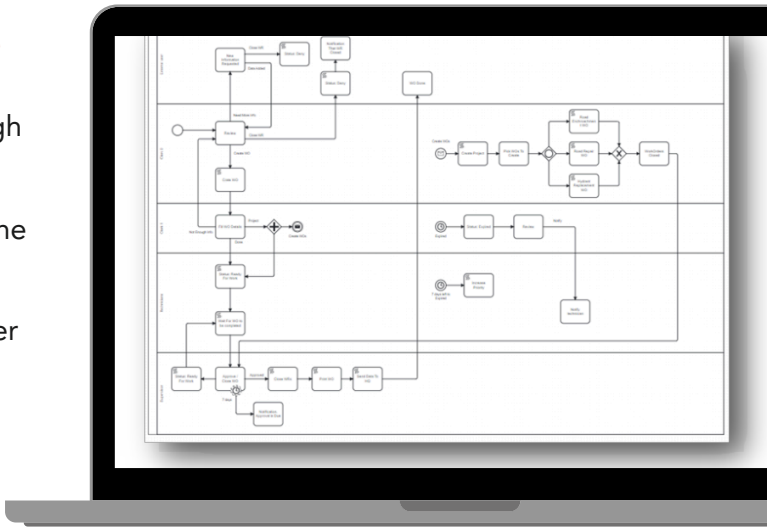
Your ability to keep jobs moving toward completion is the difference between on-budget and on-time and not. Avoidable work stops and slow-downs are hard to defend and have cascading effects down the work line. Automating workflow management saves time, money, and headaches.

MaintStar's powerful Workflow extension **automates complex business processes**, routes work to the right people, and streamlines reviews and approvals. **The system employs flow charts and swim lane diagrams to create a series of automated steps in the business process, ensuring efficiency and consistency.** You can automate actions and deliverables and keep time-sensitive work on track – all with minimal human intervention so your staff can focus on the work only they can do.

With MaintStar's Workflow extension for our Public Works Suite for Enterprise Asset Management, you can see all the work you're managing, the processes needed to complete it, and the data you'll need to create reports on it. All in one place, all in one platform.

Automate Complex Business Processes

- Coordinate multi-step activities from initiation through completion with consistent, repeatable workflows
- Visually design workflows with flowchart and swim lane diagram templates
- Automatically create work orders, assign tasks, trigger reviews, and move work forward based on roles, business rules, status, and other criteria
- Zero-code design doesn't require IT to setup or support

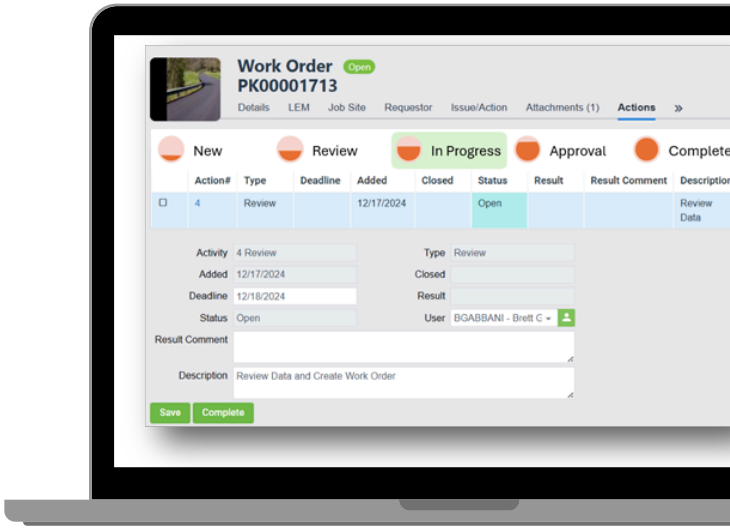


Streamline Reviews and Approvals to Keep Time-Sensitive Work on Track

- Build approval paths that support handoffs, decisions, escalations, and accountability across teams
- Use deadlines, timers, reminders, and automated actions to help prevent critical activities from being overlooked

Automate Actions, Reports, and Deliverables

- Generate reports and documents, execute business logic, update information, and trigger downstream activities as part of the workflow
- Track progress with real-time visibility into work status



With MaintStar's Workflow extension for our Public Works Suite, you're better organized to plan and track work, spend smarter, and support resource requests with factual data.

That's the MaintStar difference.
